

BALTEK[®] VBC

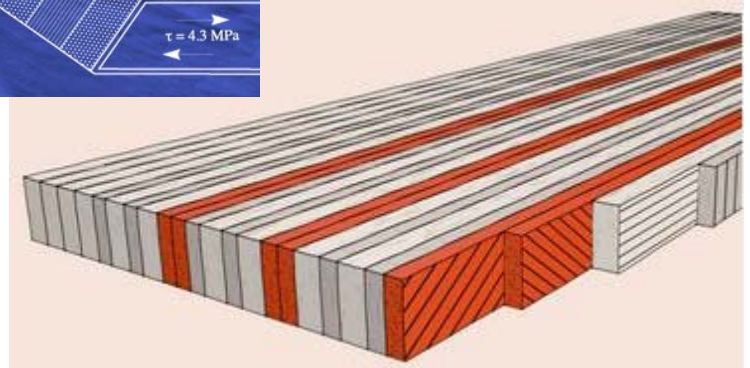

New **sandwich core** made using **lightweight** balsa veneers.

- Mechanical properties and failure mode can be tailored based on **veneer orientations**: [0/90], [+45/-45], [0/90/+45/-45], etc.
- Other products such as **foam** or **flax fibers** may be incorporated.

The new Stockli ski uses Bcomp's **bCores[®] QX** which combines **BALTEK[®] VBC** with flax.

Achieves 600g weight savings
vs. standard wood ski cores
+ optimized vibration properties in a
sustainable product.
