

Flake SMC

Lightweight and **high-performance** CFRP material made from scrap prepreg for use in aesthetic and structural parts.

- Similar to Hextool material used for tooling and other carbon molding compound materials.
- Produces **flat, resin-rich, cosmetic** surfaces.
- Targeted to **cut cost** by 50% vs. new prepreg at \$65-\$100/lb.
- Helps improve the **sustainability** of composites.

Scrap from cutting rolls of prepreg

Scrap is sorted and prepped

Flake SMC ready for press
or vac-bag molding
