High-Performance Resins 2010

At CompositesWorld’s High-Performance Resins 2010, recent developments in resin technologies will be discussed by industry innovators in the fields of high-temperature resistance, advancements in infusion systems, fire-resistant applications and improved mechanical properties. Presentations about breakthroughs in thermoset and thermoplastic composite systems are planned, including topics such as additives for improved fiber-wetting and bonding and curing mechanisms for advanced composite processing, and nanoparticle technology, such as carbon nanofibers and nanoplatelets for improved properties.

Sponsorships & exhibits

High-Performance Resins 2010 offers you a great opportunity to increase your visibility before a highly targeted and qualified audience of key decision makers. Sponsorships and exhibit space are still available for several conference functions. We also offer advertising opportunities in the conference proceedings. For details, please contact:
